

Electrical Controls Engineer

Alpha Converting designs and manufactures a wide range of winding equipment for the converting industry. Our machines are varied, high quality, often automated and exported worldwide. The Company is constantly innovating and is an exciting place to work providing many technical challenges. There is considerable job satisfaction every time you complete a machine successfully and it is delivered to our customer.

The position involves a wide range of skills including electrical circuit design, variable speed and servo drives, PLCs (Siemens & AB), and HMIs. There is a considerable amount of software content and you should be able to plan and implement complex programs.

You should be experienced in special purpose machines, be able to think and will enjoy a challenge and be able to rapidly pick up new ideas. Working in a small team you will have responsibility for your own projects and follow these through from initial concept to customer acceptance trials.

Considerable opportunities exist according to ability. If you have good leadership skills there are opportunities to take a strategic role in the management of the Company including joining the Board.

Some travel is available, and you must be free to travel within Europe & USA without requiring a visa.

We are a flexible efficient and quality orientated company and expect any applicants to have the same attitude and to be committed to the success of the company.

Opportunities are available for less experience graduates with a good relevant engineering degree.

Salary range £30,000 to £50,000.

Generous pension.
